

RebulCrate UltimateProtection

With the strength of a wooden crate, the multi award winning Rebul Crate provides better protection, more simply and affordably for manufacturers. In Australia, Rebul Crates are widely trusted for protecting delicate and valuable goods through interstate and overseas transport.

Compression strength* – capable of supporting objects of 1 tonne packed inside the crate.

Bending strength – superior to plywood crates, ensuring better protection of valuables when goods shift in transit.

Stacking strength** – making more cost effective use of container space, without the risk of damage.

Each of these strength properties can be easily enhanced to even greater levels to suit the type of protection required, the means of transport and the destination demands.

No Limitations

No limitations on crate dimensions, order quantities or internal supports. Delivered anywhere in Australia.

**Compression strength tested to 2.3 tonne in accordance with International Standard ISO 12048, Amcor Research and Technology, Victoria, Australia*

***Crate of 1000 x 1000 x 740mm tested to have a stacking strength of 855kg. Also successfully drop tested, without breaking from 0.8 metres, while filled with sand.*

Stacked - 1 cubic metre crates with 1 tonne in each

Flat pack for storage, delivery and reuse.

Better All-Round Protection

High strength – a robust and rigid crate that provides necessary structural support.

Shock absorbing – greatly reduces the shock transferred onto delicate objects during transport.

Low abrasion – gentle on sensitive surfaces, no scratching or rubbing.

Easier, quicker, safer to pack and unpack

Access from any side – easier, quicker, safer to pack and unpack.

No fumigation – no additional costs or risk of non-compliant timber.

Flat pack – disassembles to a fraction of the size for ease of storage and reuse.

1/6th the weight of wooden crates – light and no splinters means easier and safer carrying.

No nails or tools required – no risk of damage to object in packing/unpacking.

Reusable, Recyclable – Good for your business, good for the environment.

In each crate design, Rebul leverages the broad experience of its international manufacturing presence and years of crating all types of valuable goods going to most destinations around the world.

With accurate and professional crating, Rebul works with manufacturers across a multitude of industries, such as electronics, automotive, defence and others, bringing them:

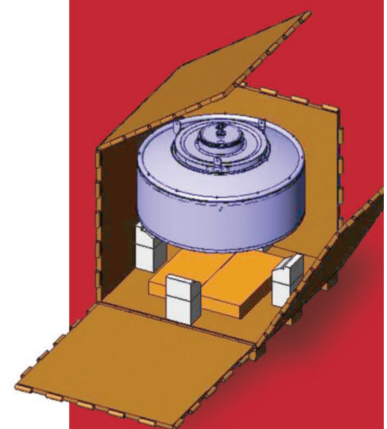

The most simple and affordable way to ensure
Ultimate Protection

Quick, simple and secure

*High durability exterior.
Multi-use crate with
internal supports*

*Customised internal
3D design*

Bring better crating to your business
